RAV4

THERE'S DESIGN AND THEN THERE'S STYLE

A POWERFUL DESIGN STATEMENT WITH TRUE SUV CHARACTER.

The New RAV4 is an SUV that was built to be driven – and designed for those who choose to stand out. Pairing the robust looks of a fully fledged SUV with sharp, dynamic styling, the New RAV4 displays a sleek, urban edge. Powerful with a real road presence, the New RAV4's strong body draws the eye from the elegant front LED headlights, along the bold profile silhouette and through to the unique LED tail lights – producing a look that is individual and refined. The New RAV4's rugged SUV stance proves it looks and acts the part, while being completely at home in the city.

THERE'S HYBRID AND THEN THERE'S TOYOTA HYBRID

THE HYBRID SUV DESIGNED FOR EVERY ROAD AND EVERY CITY.

The New RAV4's powerful 2.5-litre Petrol Hybrid powertrain delivers outstanding performance without compromise. It gives you confidence in every driving situation, from the motorway to the city and challenging road conditions. And thanks to its self-charging hybrid powertrain, you'll also enjoy exceptional range – giving you the benefits of electric power, such as a quiet drive and greater efficiency, without inconvenience.

With the New RAV4, you can glide through the city, embrace the open road and leave compromise behind.

THERE'S CONTROL AND THEN THERE'S CONFIDENCE

THE NEW RAV4 DRIVES LIKE NO OTHER SUV BECAUSE IT'S BUILT LIKE NO OTHER SUV.

The New RAV4 represents an uncompromising balance of space, ride comfort, power and all-road capability. The innovative TNGA platform has enabled Toyota's engineers to reduce the car's weight, lower its centre of gravity and increase both chassis rigidity and driver visibility. Together, these changes make the New RAV4 easier to handle and seriously fun to drive. The platform has also given the designers more freedom to create a stylish car, with more room throughout for both passengers and luggage.*

The result is a supremely capable SUV in which you can go anywhere in safety and style – and one you will just love to drive.

INNOVATIVE TECHNOLOGY DESIGNED AROUND YOUR NEEDS.

To make every journey more enjoyable, the New RAV4 includes features like an optional 9-speaker JBL® audio system, for concert quality sound. Part of a suite of thoughtfully applied technology, it all comes together to make life easier, whatever the driving situation. For example, when you're manoeuvring in confined spaces, the optional 360° Panoramic View Monitor makes sure nothing lies beyond your line of sight. It's just one of the intelligent features that makes the New RAV4 as easy to handle in the city as it is on the open road.

The Blind Spot Monitor allows the driver to manoeuvre more safely during lane changes. If the rear-mounted radar sensors detect a vehicle in your side or rear blind spot, a warning indicator will illuminate on the appropriate side mirror. Should you indicate to change lanes and a vehicle is in your blind spot, the warning indicators will flash to alert you that a lane change should be avoided.

TOWING

Tow bars – detachable and fixed

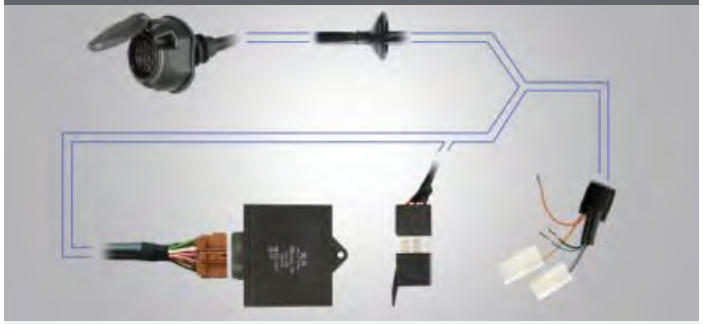

Toyota tow bars are available with a fixed or detachable hook. Both provide a strong towing capability and will support the Toyota rear-mounted bicycle holder.

Features

— Towing capacity: FWD – without brakes 750 kg, with brakes 800 kg. AWD-i – without brakes 750 kg, with brakes 1650 kg. (The tow bars are designed for your car's maximum towing capacity.)
— Supplied with a protective tow-ball cap bearing the Toyota logo.
— With the detachable tow bar, a smart plastic cover is supplied to place over the base when the hook is removed.
— On the detachable tow bar, the hook attaches or removes by means of a turning knob that also incorporates a security lock.

Tow bar wiring harness

Safety for you and your car is at the heart of the Toyota tow bar wiring harness. Individually designed for each Toyota model, the harness seamlessly integrates your car's lights and signals with those on a towed trailer or rear bicycle holder.

Features

— The harness has independent circuitry and a fused module to eliminate the risk of overloading your car's existing electrical system.
— The fused module prevents a fault in the trailer's circuitry affecting your car's systems. For instance, your car's indicators will continue working even if those on the trailer fail.
— Toyota specialists designed the cable route to safely avoid contact with moving parts, heat, irregular surfaces and metal edges.
— There are no loose or hanging cables that could catch on road obstacles or interfere when loading or unloading the boot.
— Strategic reinforced cable protection guards against accidental damage and the consequent risks of lighting failure or fire caused by electrical shorting.
— Available with a 7- or 13-pin socket.

Socket adapters

If you have an existing trailer or rear bicycle holder, or perhaps you want to hire a trailer when you travel in another country, you may find that the plug socket is different to that on your new car. Such a problem is easily resolved! A Toyota socket adapter enables you to safely and securely connect your car's tow bar wiring harness to that of a trailer or bicycle holder even if the plugs don't match.

Toyota adapters are designed to provide a durable connection between different types of plug sockets. They are available in three versions:

— 7-pin (car) to 13-pin (trailer).
— 13-pin (car) to 7-pin (trailer).
— 13-pin (car) to 12N-12S double socket (trailer).

While every effort is made to reproduce accurate information, we reserve the right to change specifications, equipment and availability without prior notice. This brochure cannot be regarded as infallible (some of the vehicles shown may not be to exact UK specification), and as such does not constitute an offer for sale of any particular vehicle or specification. For the latest specification and availability, we ask that you contact your local Toyota Centre. Vehicle body colours may differ slightly from the printed images in this brochure.

Quoted mpg and CO_2: Figures are provided for comparability purposes; only compare fuel consumption and CO_2 figures with other cars tested to the same technical procedures. These figures may not reflect real-life driving results. Fuel consumption and CO_2 produced varies significantly depending on a number of factors, including the accessories fitted (post-registration), driving style, conditions, speed and vehicle load.

All models and grades are certified according to the World Harmonised Light Vehicle Test Procedure (WLTP), which replaces the New European Driving Cycle test procedure (NEDC).

All CO_2 figures quoted are NEDC equivalent. This means the CO_2 figures are based on the new WLTP test procedure but calculated (using a standard European calculation method) to allow comparison with the NEDC test procedure. The NEDC equivalent figures will be used to calculate vehicle tax on first registration. All mpg figures quoted are full WLTP figures.

More information can be found by visiting: www.vehicle-certification-agency.gov.uk/fcb/wltp.asp.

The official CO_2 figures for vehicles changed as from 6 April 2020, due to a change in the official method of calculation. CO_2 figures are used in the calculation of Vehicle Excise Duty (car tax) for new cars during their first year of registration. As a result, all CO_2 figures, car tax and recommended 'on the road' prices for new vehicles are subject to change for vehicles registered after 6 April 2020. Please contact your local Toyota Centre for further information.

The use of the term 'Toyota Accessories' should not be taken to imply that the products on the accessory pages are actually manufactured by the Toyota Motor Corporation or Toyota (GB) PLC. Toyota (GB) PLC is continually updating and changing specifications of accessories and reserves the right to do so at any time without prior notice.
